

CAMBRIDGE O LEVEL 5054 · IGCSE 0625

O Level & IGCSE Physics — Topic Outline

The six syllabus sections, in the order they are taught. Each section is covered with live core teaching, recorded revision modules, a topic quiz, and past-paper practice.

-
- | | |
|----------|--|
| 1 | Motion, forces and energy
Physical quantities and measurement · Motion · Mass and weight · Density · Forces · Momentum · Energy, work and power · Pressure |
|----------|--|
-
- | | |
|----------|--|
| 2 | Thermal physics
Kinetic particle model of matter · Thermal properties and temperature · Transfer of thermal energy |
|----------|--|
-
- | | |
|----------|--|
| 3 | Waves
General properties of waves · Light · Electromagnetic spectrum · Sound |
|----------|--|
-
- | | |
|----------|---|
| 4 | Electricity and magnetism
Simple phenomena of magnetism · Electrical quantities · Electric circuits · Electrical safety · Electromagnetic effects |
|----------|---|
-
- | | |
|----------|---|
| 5 | Nuclear physics
The nuclear model of the atom · Radioactivity |
|----------|---|
-
- | | |
|----------|---|
| 6 | Space physics
Earth and the Solar System · Stars and the Universe |
|----------|---|
-
- ## ASSESSMENT
- Paper 1** — Multiple choice across the syllabus.
- Paper 2** — Structured theory questions.
- Paper 3 / Practical** — Practical skills, or the alternative-to-practical paper.
- ## O LEVEL OR IGCSE?
- The physics is largely shared between 5054 and 0625. The differences sit in paper structure and assessment — 0625 has more paper variants, including separate practical options. Which one you sit is set by your school's entry, not by you.
- Sir Mehboob Khan · Concepts → Clarity → Success · Always confirm against the current Cambridge International syllabus.
